Procedure for the Management of Club Assets

This procedure is designed to address the handling of equipment or other assets donated to the club by members or others, All assets donated become property of the club and belong to the club membership at large. It is important that strict guidelines be followed in the accepting, recording and distribution of any club property.

Assignment of Responsibility

The club Trustees will have primary responsibility for assuring that this procedure is being followed in every case involving the transfer of equipment to the club. They will also be responsible for the custody of all donated equipment however, they can make any storage arrangements that they believe appropriate.

Accepting Donated Equipment

Any donation to the club must be promptly acknowledged by a letter sent to the donor and signed by a trustee or any officer. A copy of this letter must be sent to the President, Secretary and Treasurer.

Control and Reporting Requirements

The Secretary will maintain a record indicating the type of equipment, serial number, a general statement of condition, and a "record book value" if applicable. Any item judged by the Trustees to have a value of \$100 or over must be assigned a "recorded book value" dollar amount. The President or his designee must formally announce the acquisition of any donated equipment at the next club membership meeting following the actual date of the donation.

Distribution of Club Assets

The Trustees and Officers must jointly approve any action to make any club asset available to the membership through auction, sealed bidding, or placement on the club table for resale. Once the distribution method is agreed upon, the "recorded book value" will be used as the "minimum dollar amount" accepted for bid. Any item to be made available under the above approved distribution method must be formally announced to the club membership in advance and with written notice in the club newsletter at least thirty days prior of any "for sale" auction.
