As club members, we recognize mollusks are part of the precious natural wildlife resources and make every effort to protect and preserve them. We share awareness and try to leave shelling spots as undisturbed as possible, take only specimens needed for collections and study, and leave live egg cases to grow. We also promote the preservation of habitats for the enjoyment and benefit of generations to come.

The Shell Seekers

2009: Linda Powers speaks about Philip-pines trip. Nature Walk with Bud Doyle at North Jetty, Nokomis. Adopted "The Shell Seekers" motif.

Jan. 2010: Began 15th anniversary year. Celebrated on *Marina Jack II* w/luncheon cruise and at club mtg. Dr. Gary Schmelz guest speaker on Florida fossil shells.

March 2010: Peter Dance (England) and Harlan Wittkopf (USA), world renowned shellers are guest speakers.

On board the *Marina Jack II* anniversary luncheon cruise, January 22, 2010. From left: Club Founder and former President Barb Myers, current President Christina Anglin, former President and current Vice President Debbie Freeman, current Parliamentarian and former President Marilyn Boyd, and current Programs Chair and former President Anita Wilson. *Jack II* on January 22, 2010.

Jan. 2010: Dr. Gary Schmelz, Peter Dance and Harlan Wittkopf become Honorary Members. Club reaches 150 members, treasury at \$4,324.03.

Thanks is not enough.

On behalf of the entire Englewood Shell Club, a special thanks goes out to all of the early Englewood Shell Club members for their enthusiasm and support of the club. These Charter members gave of their time and offered many ideas for club activities. The club has grown tremendously due to their efforts and interests. Another thank you goes out to the local reporters and their editors, especially from *The Sun*, *Herald-Tribune*, and *The Venice Gondolier*, who generously reported on our club's activities over the years. A giant thank you also goes out to the many members who contributed their photos and memorabilia to be retained in our club's scrapbooks. The scrapbooks are now considered our history books and are carefully managed by club historians. These books were relied on heavily during the preparation of this publication. And a thank you also goes out to our former presidents: Barb Myers, Marilyn Boyd and Debbie Freeman, whose collective memory was instrumental in sorting out the many details for this issue.

The Shell Scoop Anniversary Issue

Englewood Shell Club

ESC Charter

The Englewood Shell Club was formed January 23, 1996, to bring together people interested in sea-shells. Club members share their enthusiasm and experiences about mollusks of all kinds. The main interest is in Florida shells.

How We Began

Tired of traveling back and forth to the Sarasota Shell Club, Barb Myers asked fellow sheller, Elsie Doyle why they couldn't start their own club in Englewood. They agreed they could and on January 23, 1996, the first meeting was held at the Charlotte County Library at Tringali Center. Both were worried no one would come after advertising the first meeting in the local paper. To their surprise, 26 enthusiastic shellers came and continued to come back.

ties that remain central to Englewood Shell Club (ESC) today.

Founding member Barb Myers.

speaker at our General Meetings. The Sanibel-Captiva Shell Club was another source of support for the early members of the club.

Today, we have over 150 members and programs and interests that were never imagined back in 1996.

Barb is quick to point out that all of our club activities exist and thrive because of dedicated, enthusiastic, and talented members who do not hesitate to volunteer and willingly give of themselves to make the club better and stronger every year. Our club is now rich in history and recognized as one of the largest and most active shell clubs in the world.

One of the first mentors and an early supporter of the club was a newcomer to the Bailey Matthews Shell Museum in Sanibel, Dr. Jose' Leal. He is one of our Honorary Members and a frequent guest

Club Emblem

Common Name:
Lightning Whelk
or left-handed
whelk

Scientific name:
Busycon sinis-
trum

Year name:
Busycon con-
trarium Conrad,
1840

Why the Lightning Whelk

The Lightning Whelk seemed an appropriate shell to select for the club emblem as it was commonly found on Englewood beaches. Plus, Englewood was located in the "Lightning Capital of the World." The Lightning Whelk is a colorful shell and

known to grow large. This was a hope of the club back in 1996—to grow.

The common name for the shell is derived from its streaks which appear to resemble lightning flashes.

The shell's scientific name indicates the way it grows with a left spiral contrary to the way of most other shells.

Whelks are found in many sizes and are perfectly formed even when miniature. They feed on clams.
